

Primary Survey in English

Number	Question
1	Clarity of requirements in the Product Backlog Were the user stories in the backlog clear enough? Did the descriptions suffice to understand what the Product Owner really wanted?
2	Effort estimation Were the estimates of required work (story points / man-hours) of user stories adequate / realistic?
3	Maintenance of the Sprint Backlog Was it clear how to handle user stories? How to log performed work?
4	Administrative workload Does the administrative work called for by Scrum (meetings, planning, reviews, maintenance of backlog, etc.) represent a significant additional workload?
5	Cooperation with the Scrum Master Was the cooperation with the Scrum Master adequate / satisfactory? Did the Scrum Master contribute to the team's success?
6	Cooperation with the Product Owner Was the cooperation with the Product Owner adequate / satisfactory?
7	Cooperation with other Team members Was the cooperation with other Team members satisfactory / adequate? Did the Scrum process encourage cooperation?
8	Workload Was the amount of work required for the project adequate?
9	Satisfaction with work Are you satisfied with the work / the results of this sprint?
10	Satisfaction with Scrum Is the methodology useful? Would you recommend Scrum to other software developers?

Questions of the primary survey (S1) in English. Questions could be answered on a 5-point scale of “strong no” to “strong yes”.
